```
/note-*Organ: Kidney; Vector: pME18S-FL3; Site_1: DraIII (CACGYGTGS); Site_2: DraIII (CACCAYGTGS); 1st strand cDNA was primed with an oligo(dT) primer [ATGTGGCCTTTTTTTTTTTTTTT]; double-stranded cDNA was ligated to a DraIII adaptor [TGTTGGCCTACTGG], digested and cloned into distinct DraIII sites of the pME18S-FL3 vector (5' site CACGTGTGG, 3' site CACCATGTG). KnoI should be used to isolate the cDNA insert. Size selection was performed to exclude fragments <1.5kb. Library constructed by Dr. Sumio Sugano (University of Tokyo Institute of Medical Science). Custom primers for sequencing: 5' end primer CTGTGCTCTAAAAGCTGCG and 3' end primer CGACCTGAGCACA."

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

-!- TISSUE SPECIFICITY: EXPRESSED IN A WIDE VARIETY OF TISSUES, WITH
HIGHEST LEVELS IN THE HEART AND SKELETAL WISCLE.
-!- DOMAIN: INTACT BH3 DOMAIN IS REQUIRED BY BIK, BID, BAK AND BAX FOR
THEIR KILLING ACTIVITY AND FOR THEER INTERACTION WITH ANTI-
APOPTOTIC MEMBERS OF THE BCL-2 FAMILY.
-!- SIMILARITY: CONTAINS A BCL-2 HOMOLOGY DOMAIN 1 (BH1).
-!- SIMILARITY: CONTAINS A BCL-2 HOMOLOGY DOMAIN 2 (BH2).
-!- SIMILARITY: CONTAINS A BCL-2 HOMOLOGY DOMAIN 3 (BH3).
-!- SIMILARITY: BELONGS TO THE BCL-2 FAMILY.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        -i-TISSUE SPECIFICITY: EXPRESSED IN A WIDE VARIETY OF TISSUES, WITH HIGHEST LEVELS IN THE HEART AND SKELETAL MUSCLE.

-I-DOMAIN: INTACT BH3 DOMAIN IS REQUIRED BY BIK, BID, BAK AND BAX FOR THEIR KILLING ACTIVITY AND FOR THEIR INTERACTION WITH ANTI-APOPTOTIC MEMBERS OF THE BCL-2 FAMILY.

-I-SIMILARITY: CONTAINS A BCL-2 HOMOLOGY DOMAIN 1 (BH1).

-I-SIMILARITY: CONTAINS A BCL-2 HOMOLOGY DOMAIN 2 (BH2).

-I-SIMILARITY: CONTAINS A BCL-2 HOMOLOGY DOMAIN 3 (BH3).

-I-SIMILARITY: CONTAINS A BCL-2 HOMOLOGY DOMAIN 3 (BH3).

                                                                                                                                                                                   BAK PROTEINS, AND WITH BCL-K(S). HETERODIMERIZATION WITH BAX REQUIRES INTACT BH1 AND BH2 DOMAINS, AND IS NECESSARY FOR ANTI-APOPTOTIC ACTIVITY (BY SIMILARITY).

SUBCELLULAR LOCATION: WITOCHONDRIAL INNER AND OUTER MEMBRANES, AS WELL AS NUCLEAR ENVELORE AND ENDOPLASMIC RETICULOM.

ALTERNATIVE PRODUCTS: TWO FORMS OF BCL-2: ALPHA, AND BETA, ARE PRODUCED BY ALTERNATIVE SPLICING OF THE SAME GENE. THEY ONLY DIFFER AT THEIR C-TERMINAL BNDS.

TISSUE SPECIFICITY: EXPRESSED IN A VARIETY OF TISSUES.

DOMAIN: BH4 DOMAIN SEEMS TO BE INVOLVED IN THE ANTI-APOPTOTIC
                 -i- FUNCTION: PROLONGS THE SURVIVAL OF HEMATOPOIETIC CELLS IN THE ABSENCE OF REQUIRED GROWTH FACTORS AND ALSO IN THE PRESENCE OF VARIOUS STIMULI INDUCING CELLULAR DEATH. BCL2 BLOCKS APOPTOSIS BECAUSE IT INTERFERS WITH THE ACTIVATION OF CASPASES BY PREVENTING THE RELEASE OF CYTOCHROME C. MIGHT FUNCTION IN AN ANTIOXIDANT PATHWAY TO PREVENT APOPTOSIS AT SITES OF FREE RADICAL
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       76 VATAGPALSPVPPCVHLTLRRAGDDFSRRYRRDFAEMSSQLHLTPFTARGRFATVVEELF 135

                                                                                                                                                                                                                                                                                                                                                                                          ABSENCE OF REQUIRED GROWTH FACTORS AND ALSO IN THE PRESENCE OF VARIOUS STIMULI INDUCING CELLULAR DEATH. BCL2 BLOCKS APOPTOSIS BECAUSE IT INTERFERES WITH THE ACTIVATION OF CASPASES BY PREVENTING THE RELEASE OF CYTOCHROME C. MIGHT FUNCTION IN AN ANTIOXIDANT PATHWAY TO PREVENT APOPTOSIS AT SITES OF FREE RADICAL GENERATION SUCH AS MITOCHONDRIA. SUBMUTE: FORMS HOMODIMERS AND HETERODIMERS TOGETHER WITH BAX AND BAK PROTEINS, AND WITH BCL. X(S). HETERODIMERIZATION WITH BAX AND REQUIRES INTACT BHI AND BH2 DOMAINS, AND IS NECESSARY FOR ANTI-APOPTOTIC ACTIVITY.

REPLOG. DEV. 47:26-29(1997).

-1- FUNCTION: DOMINNIT REGULATOR OF APOPTOTIC CELL DEATH. THE LONG FORM DISPLAYS CELL DEATH REPRESSOR ACTIVITY, WHEREAS THE SHORT ISOFORM PROMOTES APOPTOSIS (BY SIMILARITY).

-1- SUBCELLULAR LOCATION: MITOCHONDRIAL MEMBRANES AND PERINUCLEAR ENVELOPE (BY SIMILARITY).

-1- ALTERNATIVE PRODUCTS: A LONG ISOFORM (SHOWN HERE) AND A SHORT ISOFORM ARE PRODUCTS: A LONG ISOFORM (SHOWN HERE) AND A SHORT ISOFORM ARE PRODUCTS: A LONG ISOFORM (SHOWN HERE) AND A SHORT ISOFORM ARE PRODUCTS: A LONG ISOFORM (SHOWN HERE) AND A SHORT ISOFORM ARE PRODUCTS: A LONG ISOFORM (SHOWN HERE) AND A SHORT ISOFORM ARE PRODUCTS: A LONG ISOFORM (SHOWN HERE) AND A SHORT ISOFORM ARE PRODUCTS: A LONG ISOFORM AND A SHORT ISOFORM AND A SHOR

Mean 45.917; Variance 78.366; scale 0.586 Statistics: Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

ALIGNMENTS

SUBCELLULAR LOCATION: CYTOLARMIC TISSUE SPECIFICITY: EXPRESSED IN ALMOST ALL MYELOID CELL LINES AND IN A WIDE RANGE OF TISSUES, WITH HIGHEST LEVELS IN BRAIN, COLON,

AND SALIVARY GLAND.

3888888888888888888888888

-1- SIMILARITY: CONTAINS A BCL-2 HOMOLOGY DOMAIN 1 (BH1).
-1- SIMILARITY: CONTAINS A BCL-2 HOMOLOGY DOMAIN 2 (BH2).
-1- SIMILARITY: CONTAINS A BCL-2 HOMOLOGY DOMAIN 4 (BH4).
-1- SIMILARITY: BELONGS TO THE BCL-2 FAMILY.

Patent No. 5646008
GENERAL INFORMATION
APPLICANT: Thompson, Craig B.
APPLICANT: Boise, Lawrence H.
TITLE OF INVENTION: Vertebrate Apoptosis Gene:
TITLE OF INVENTION: Compositions and Methods
NUMBER OF SEQUENCES: 8
CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     233 AA.
                                                                                                                                                                                                                                                                                                                                                                                                                                          15726A-000700
